Advanced Technician in Web Application  
Development (DAW) 2021 - 2023  
Electrical and Automatic Installations  
Technician 2019 - 2021
- ## SKILLS
- Python
  - WordPress
  - JavaScript / TypeScript
  - Databases
  - Angular
  - IoT environments
  - Node.js
  - Automation and data acquisition
  - Risk analysis and management
  - Information security (ISO 27001)
  - Implementation of security controls
  - Threat detection and mitigation

## LANGUAGES

- Spanish Native
- English Intermediate

## ABOUT ME

Technical professional with a hybrid profile in software development and cybersecurity, with experience in real-world R&D environments. Specialized in web applications, hardware-software integration, and data acquisition. Trained in information security and risk analysis. Currently pursuing a Master's degree in Cybersecurity, geared towards IT technical roles.

## EXPERIENCE

- Research Technician Level 1 2024 - 2026  
**Universidad de Valladolid**  
Development of web applications for the visualization and management of data from sensor systems. Programming in Python and hardware-software integration in IoT environments and distributed systems. Application of artificial intelligence and security best practices for data control and protection.
- Full Stack Developer March 2023 - July 2023  
**ZG Service**  
Web application development using Angular and Node.js, including API implementation and business logic. Management of InfluxDB databases for handling temporary data and development of corporate websites with WordPress. Experience working in agile environments, collaborating through version control.

## CERTIFICATIONS

- Internal Auditor of Information Security Management Systems  
ISO 27001:2022 Standard - IEP / CUA
